Several different kinds of antiretroviral drugs are currently used to treat HIV-1 infection.

- These medicines are the ones most commonly used in clinical practice; this brochure does not contain a complete list of every medication used to treat HIV
- These medicines do not cure HIV-1 infection or AIDS
- These medicines do not eliminate the risk of passing HIV-1 to others
- Treatment of HIV-1 infection requires a combination of HIV-1 medicines
- Not all medicines are right for all people, and treatments may be different for each person; talk with your doctor or other health care provider if you have questions about your treatment

NOTE: Some of these medications pictured may also be available in a generic form, but the generic forms are not pictured here. Tablets and capsules pictured are not actual size.
### Nucleoside Reverse Transcriptase Inhibitors (NRTIs)
NRTIs block reverse transcriptase, an enzyme HIV-1 needs to make copies of itself.

### Non-Nucleoside Reverse Transcriptase Inhibitors (NNRTIs)
NNRTIs bind to and alter reverse transcriptase, an enzyme HIV-1 needs to make copies of itself.

### CCR5 Antagonists
CCR5 antagonists block CCR5, a protein on the CD4 cells that a certain type of HIV-1 needs to enter the cell.

* These drugs are also available as part of a fixed-dose combination (FDC) product. Images of FDC products are on the last page.
Protease Inhibitors (PIs)
PIs block HIV-1 protease, an enzyme HIV-1 needs to make copies of itself.

Integrase Strand Transfer Inhibitors (INSTIs)
Integrase strand transfer inhibitors block HIV-1 integrase, an enzyme HIV-1 needs to make copies of itself.

**Atazanavir**
- trade name: REYATAZ
- 150 mg Reyataz capsule
- 200 mg Reyataz capsule
- 300 mg Reyataz capsule

**Lopinavir/Ritonavir**
- trade name: KALETRA
- Image of this product is on last page.

**Nelfinavir**
- trade name: VIRACEPT
- 250 mg Viracept tablet
- 625 mg Viracept tablet
- 50 mg/g Viracept oral powder

**Darunavir**
- trade name: PREZISTA
- 75 mg Prezista tablet
- 150 mg Prezista tablet

**Ritonavir**
- trade name: NORVIR
- 100 mg Norvir capsule
- 100 mg Norvir tablet
- 80 mg/mL Norvir oral solution

**Saquinavir**
- trade name: INVIRASE
- 200 mg Invirase capsule
- 500 mg Invirase tablet

**Fosamprenavir**
- trade name: LEXIVA
- 700 mg Lexiva tablet

**Tipranavir**
- trade name: APTIVUS
- 250 mg Aptivus capsule

**Dolutegavir**
- trade name: TIVICAY
- 50 mg Tivicay tablet

**Elvitegravir**
- trade name: VITEKTA
- 85 mg Vitekta tablet
- 150 mg Vitekta tablet

**Raltegravir**
- trade name: ISENTRESS
- 25 mg chewable Isentress tablet
- 100 mg chewable Isentress tablet
- 100 mg packet Isentress oral suspension

**Fusion Inhibitor**
Fusion inhibitors block HIV-1 from entering the CD4 cells of the immune system.

**Enfuvirtide [T-20]**
(subcutaneous injection)
- trade name: FUZEON
- 90 mg Fuzeon vial

**Pharmacokinetic Enhancer**
Used as a pharmacokinetic enhancer/booster for some antiretroviral medications, but is not an antiretroviral drug

**Cobicistat**
- trade name: TYBOST
- 150 mg Tybost tablet

*These drugs are also available as part of a fixed-dose combination (FDC) product. Images of FDC products are on the last page.*
Combination Antiretrovirals

Fixed-dose combination tablets contain two or more medications from one or more drug classes.

These four medications are considered “complete regimens” because each tablet contains a combination of antiretroviral drugs, which makes a full regimen.

### Abacavir/Dolutegravir/Lamivudine
- **Trade name:** TRUMEQ
- 600 mg/30 mg/300 mg Trumeq tablet

### Elvitegravir/Cobicistat/Emtricitabine/Tenofovir
- **Trade name:** STRIBILD
- 150 mg/150 mg/200 mg/300 mg Stribild tablet

### Efavirenz/Emtricitabine/Tenofovir
- **Trade name:** ATRIPLA
- 600 mg/200 mg/300 mg Atripla tablet

### Emtricitabine/Rilpivirine/Tenofovir
- **Trade name:** COMPLERA
- 200 mg/25 mg/300 mg Complera tablet

### Abacavir/Lamivudine
- **Trade name:** EPZICOM
- 600 mg/300 mg Epzicom tablet

### Emtricitabine/Tenofovir
- **Trade name:** TRUVADA
- 200 mg/300 mg Truvada tablet

### Abacavir/Lamivudine/Zidovudine
- **Trade name:** TRIZIVIR
- 300 mg/150 mg/300 mg Trizivir tablet

### Lamivudine/Zidovudine
- **Trade name:** COMBIVIR
- 150 mg/300 mg Combivir tablet

### Atazanavir/Cobicistat
- **Trade name:** EVOTAZ
- 300 mg/150 mg Evotaz tablet

### Lopinavir/Ritonavir
- **Trade name:** KALETRA
- 100 mg/25 mg Kaletra tablet

### Darunavir/Cobicistat
- **Trade name:** PREZCOBIX
- 800 mg/150 mg Prezobix tablet

### Kaletra Oral Solution
- 80 mg/20 mg/mL Kaletra oral solution

February 2015

The U.S. Department of Health and Human Services created the HIV/AIDS Prevention & Service Provider Locator—a first-of-its-kind, location-based search tool that allows you to search for testing services, housing providers, health centers and other service providers near your current location. You can access this service at: [http://www.aids.gov/locator](http://www.aids.gov/locator).
